

Emergency Response Workshop

Student Recording Sheets

Team Name: _____ Date: _____

Team Members:

Station 1: Map the City

Coverage and Location Analysis

Initial Setup

Total Population of Metro City: 500,000 people

District	Population	Density Level
Downtown	_____	■ High ■ Medium ■ Low
North Side	_____	■ High ■ Medium ■ Low
South Side	_____	■ High ■ Medium ■ Low
East End	_____	■ High ■ Medium ■ Low
West Hills	_____	■ High ■ Medium ■ Low

Station Placement Decisions

Round 1: Initial Placement

Station #	Location (Grid Square)	Population Covered	Cost to Build
1	_____	_____	\$ _____
2	_____	_____	\$ _____
3	_____	_____	\$ _____
4	_____	_____	\$ _____
5	_____	_____	\$ _____

Total Population Covered: _____ out of 500,000 (____%)

Rush Hour Challenge

Dice Roll Results: District _____ has rush hour!

Adjustments Made:

- Moved station(s) to better position
- Added extra station in affected area

■ No changes needed

New Coverage after adjustment: _____ people (____%)

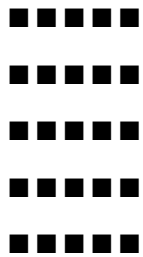

Reflection Questions

Which areas were hardest to cover? Why?

Did you have to choose between covering more people OR reducing costs? Explain:

Draw your feasible region (shade areas where you COULD place stations):

[Grid Box - 5x5]

Station 2: Racing Against Time

Response Time Simulation

Emergency Response Log

Call #	Emergency Location	Assigned Ambulance	Distance (squares)	Base Time	Traffic Card	Actual Time	Met 8-min goal?
1	_____	Station ____	_____	_____ min	_____	_____ min	■ Yes ■ No
2	_____	Station ____	_____	_____ min	_____	_____ min	■ Yes ■ No
3	_____	Station ____	_____	_____ min	_____	_____ min	■ Yes ■ No
4	_____	Station ____	_____	_____ min	_____	_____ min	■ Yes ■ No
5	_____	Station ____	_____	_____ min	_____	_____ min	■ Yes ■ No

Success Rate: _____ out of 5 calls met 8-minute goal (____%)

Traffic Event Analysis

Most Common Traffic Problem: _____ Worst Delay Experienced: _____ minutes Best Rerouting Strategy: _____

Key Observations

How did distance affect your dispatch decisions?
